

Hello everybody,

One more proposal if I may add:

- For the FSRE races, it would be better to change the start procedure and have it almost like for FSRV, with start to the right, around the bottom right buoy, avoiding a bottleneck between the AMB island and the M buoy.

- For the Hydro races, it is forbidden to use flood chambers. These are a hazard to operate and it is never clear if a boat is sinking or it has a chamber

Best regards,
