

2025 Activity report

As Vice President of the Naviga Federation, I focus primarily on the NS and C Sections, where I am an active referee. In both sections, I have a permanent contract with their Leaders, offering them advice and assistance whenever need this.

Year 2025 was a relatively uneventful for both sections. The most important challenge for the NS Section is finding good place and willing organizers to host the World Championships. Assisting Section Leader Mr. Janos Kornis, I led discussions and arrangements regarding the possible organization of the next World Championships in Poland in 2026. Unfortunately, no binding decision was reached, but there is a good chance that the event will be held in Poland in 2028.

The World Championships in Budapest were held in Class C, where, as a referee, I also served as the Naviga Representative. Together with Naviga Secretary Mr. Daniel Ciosu, we led the election of a new Section Leader. In result of this election Mr. Maciej Poznański once again become Section Leader for next two years. Furthermore, there was a problem with a registered competitor from Hong Kong, which was solved after consultation with the President of Naviga Mr. Walter Geens.

I'm still working on the draft of the new Naviga General Regules.

Unfortunately, my rehabilitation after a motorcycle accident and personal issues prevented me from completing this project on time. I hope to complete the work as soon as possible.
