

From 12 to 17 August 2025, the next European Championship in ship modeling sport in class A/B was held in Pazardzhik, Bulgaria. Representatives of the national teams of Bulgaria, England, Switzerland, Ukraine, Hungary and Armenia took part in the championship.

As in the previous year, for a known reason, the teams of Russia and Belarus did not participate.

The Bulgarian Federation of Ship Modeling Sports, under the leadership of the Federation President Evgeni Genov, has done a great job and worked throughout the championship to hold the European Championship at the required level, create the best conditions for athletes to train and achieve high sports results at the championship.

At the championship, a world record was set by the Ukrainian athlete Zhytnyk Dmytro: model class B1E 291.734 km/h (the protocol was submitted to NAVIGA).

In conclusion, I consider it necessary to express gratitude to all the people who did everything to hold the European Championship 2025 in Bulgaria at a high level.

Leader of section A/B

Hrachya Shahazizyan
